SATURDAY, JANUARY 18, 1879.

The objects of the meeting at the Masonic Hall, on Thursday, were to procure an expression of sympathy with the locked-out miners THE LIVERPOOL and CONDON and GLOBE INSURANCE COMPANY are prepared to grant insurances on first-class dwellings and buildings not used to purposes of trade, within the city and allower at the proposal insurance on first-class dwellings and buildings not used to purposes of trade, within the city and allower at the proposal insurance on first-class dwellings and buildings not used to purposes of trade, within the city and allower at the proposal are out of work. Similar attempts to obtain sympathy and support for the seamen who had quitted the A. S. N. Company's service were attended by a considerable measure of success. There is a distinction to be drawn between the two cases. Numbers of people gave sympathy or pecuniary support to the A. S. N. Company's seamen, not because they had a right to throw up their articles at a moment's notice; or to other would be untarter of right selemosynary character. But in other peots the proposal is pregnant with evil a confederation of its pregnant with evil a confederation of sympathy and support for the seamen who sympathy and support for the seamen who is pregnant with evil a confederation of the capitalist of the capit these as minor and secondary considerations, which might be overlooked in presence of the opportunity which this strike afforded for a general protest against the importation of Chinese labour. The seamen were, in fact, borne up through the difficulties in which they had placed themselves by a great wave of anti-Chinese feeling. The present appeal rests on different grounds. There is no attempt to introduce Chinese labour at Bulli. The questions at issue have to do simply with the relations between the owners of the mine and the men who have been in their employment. There is no question of inferior and their results. It may be satisfaction to the friends of thodel Republic, and to loven ment. There is no question of inferior and superior races, or the future character of the colony as a British community, to complicate the problem. The men are out of work, as they say, by the company's fault, but, as the company says, by their own. And if instead of the next. Telections which were held in settling matters with the company or making settling matters with the company or seeking October an ovember last were for this work elsewhere, they come to the public with branch of e Legislature. The Senate an application for relief, they are liable to be an application for relief, they are liable to be required to show that they come with valid claims. If they have brought their present difficulties upon themselves, and opportunities for escaping from them are open, the public not being excited and blinded by an anti-Chinese scare, may legitimately ask, (When decrease the second of the anti-Chinese scare, may legitimately ask,

What assistance they will obtain from those who look upon the question from the point new "Natal" party, under General Burlen, of view of labour or a state of the state of labour or a state of labou at the meeting will appear unanswerable and effective. To those, however, who recognise that there is another side to be considered and that capital as well as labour has its just rights and privileges, the addresses of the speakers will be powerless by reason of their singular partiality and unfairness. Nobody seems to have thought of looking at the natter from the employer's side, or to have adopted the motto of CHARLES READE'S novel,

Put yourself in his place." We have already contended that it is too late to dispute the right of working men to combine, and that trades-unionism ought not to be proscribed, but should rather be legalto be proscribed, but should rather be legalized. We have expressed regret that the Balli the pang of factory Acts, to ensure Company, or the companies acting with it in that the labouring classes should not be this matter, should have practically declared war against trade-unionism by aunouncing the intention not to employ Union men. But an impartial judgment upon the whole situ-ation is not to be formed on the sole basis of ployed Such was the programme of the onsiderations of this kind. No one can party lich during the last year or two justly deny the right of the companies to created much fuss in the States, and so employ whom they choose, to discharge whom they choose, or to receive back to their employ whom they choose of the miners who would show the labour greenback party to ploy whom they choose of the miners who the right of discretion in these matters; they have not the right to ay that their properties would ake bids for them, so strong that the have not the right to say that their properties are their own. INSTITUTION FOR THE DEAF AND DUMB AND
THE BLIND.

Yesterday a deputation from this institution, con-

sting of Mr. S. C. Brown, M.L.A., the Rov. G. King president), Dr. Renwick, the Rev. J. Milne, Messrs. J. ove, E. Robinson, J. Henry, F. R. Rebinson, J. R.

(president), Dr. Remwick, the Rev. J. Milne, Messrs, J. Love, E. Robinson, J. Henry, F. R. Robinson, J. R. Linsley, H. Phillips, and J. Mills, waited on the Colonial Secretary, to request him to place a sum of £2000 on the Estimates for the erection of an additional wing, to be used as a bespital, as workshors, and schoolrouns.

Mr. S. C. Brown having introduced the deputation.

The Rev. Grouter K ino (the president) said that the committee of the institution for the Deaf and Dumb and the Blind thought it necessary to build a bespital, as that if any epidemic areas, or any illness of m infectious character, they might be caubled to cut it short. At the persent time they were compelled to place patients in the centre of the building, which was not a suitable place, and caused risk to the other, invastes: "The exense of recting the wing to the bospital would be about £3900. The committee hoped to be able to raise £1000, and if the Government would be kind, enough to place on the Estimates a sum of £200 0, that would be neable the committee, he loped, to complete the building. Even supposing that they did not innecliately require the new rooms for hospital murposes, they could utilize them in a particular way. They were auxious to teach grown upport the purpose. When they wanted to teach they a trade her were obliged to bind him out in the city, which was very inconvenient, and actual tranded with risk. They wished to have this teaching carried out under their own supportsion. These rooms would, when erected, be converted into workshops wherein the blind could be taught trades. The institution received £450 a year from the Government. But they selected more than five times that amount from the public. They had refrained from calline on the Government as much as passible; but at present they were compelled to come, for they could not do what they desired without that id. And he trusted that the object of the committee was carry unt the original desired, that could not for and the process of the plan of the addition

ducated there, including the present immates.

Mr. HENRY desired specially to point out that the instintion was worked commitcally, the secretary having worked hard without any salary.

Sir HENRY PARKES said that, looking to the undoubted moreone of the institution and the fact that the committee had not received nor sought a great amount of sidroun the Government, be thought they had a strong claim or consideration, at the present time. The object which hey explained to him was oqually good with that of the astitution in general, and he should have great pleusure in consulting his colleagues about it. He was himself quite lisposed to view the matter favourably. Ho did not feel at therety to say more at the present time.

The deputation thanked the Premier, and withdraw.

TO THE EDITOR OF THE HERALD. TO THE EDITOR OF THE HERALD.

Sir,—A correspondent in your issue of to day, writing in the fish supply of this city, describes our metropolitan ish market, as being "miscrably and intermittently sundled with fish of the worst and coarsest description." The anguage is, in my opinion, so reckless and the statement so naccurate—indeed, I may say so utterly at variance with he fact—that I crave your permission as one knowiser omething of the subject to say a few words about the fish upply of Sydney. Any casual visitor to our fish market any at once satisfy himself concerning the variety, the xeellence, and the cheapness of fish in this city.

Except when tempestuous wenther prevails along the oast and puts a stop to deep-sea fishing, and also from the trawback on the beaches caused thereby interferes with cine fishing in the harbour, there are to be seen in the hydrony market each morning the following kinds of fish mong others, viz... schnapper, bream, and whiting, of core than one species, teragiva, red reckeed, and, at times, and the fisher in the fisher was the firm of finer see figure.

popular names of those kinds which are commonly to be found in our nankel. Surely this is a sufficiently varied and sufficiently choice supply to graiffy the most fastidious pulité; and indeed, I believe it is no uncomment thing to hear from the lips of visitors new to our colouy the highest enconitums upon the quality and abundance of our fish. I make no reference to the exceptional sources of supply furnished by the visit to our harbour, and to other herbours along our coast of the enormous schools of mullet and salmon which are so frequently captured. On this very day week I net in the harbour three nembers of a sincle fishing family, each in a boat halen to the water's cine with salmon, for which they expected to get about half-a-crown a dozen, or two peace half peany a piece for fish weighing perhaps eight pounds. But I am content to rest-my case on the every-day supply to be found in our fish market, and to affirm that those parts of the world must be most highly favoured in situation, climate, cheapness of labour, facilities of transit, from fishing grounds to fish mirkets, which can challenge conversion with ourselves. Now, as to the cheapness of lish in this city. I say nothing of the wholesale price obtained for the fish, in other words, of the prices paid direct to the fish, in other words, of the prices paid direct to the fish, in other words, of the prices paid direct to the fish, in other words, of the prices paid direct to the fish, in other words, of the prices paid direct to the fish, in other words, of the prices paid direct to the fish, in other words, of the prices paid direct to the fish, in other words, of the wholesale price obtained for the fisherman. If I permitted myself to speak on the subject, I should ecvainly say that they are grossly inadequate to the converge of the wholesale price obtained for the fishermen, or Kohler, and others. Under ordinary circumstances, that is to say when favourable weather prevails and no exceptional density and other to make the prices paid by the cent late: and, indeed, I believe it is no ancommon thing to

lately returned to Tromsoo, reports having fallen in with Russian pirates off Nova Zembla, who partially plundered her. They were in two Russian schooners, which chased and overtook the Proven and then launched beats, the crews of which were well armed. Resistance was out of the question: The boarders thoroughly overhauled the whaler, carried away aimost all her fishing gear and some provisions, and then quitting her they salled away.

From James Williamson, Dispensing and Analytical From James Williamson, Dispensing and Analytical "Mr. F. Clarke, "Dear Sir.—A most wonderful caso of the eiffeacy of your medicine has transpired here, to which really, if not knowing the fact, I was not prepared to give credence. A scallenan of great wealth and of almost world-wide fame and known, staying here for a time, was dreadfully affected with the staying here for a time, was dreadfully affected discontinuous and the staying here for a time, was dreadfully affected with the staying here for a time, was dreadfully affected discontinuous and the staying here for a time, was dreadfully affected without medical ment in the pain. He consulted the most examinent medical ment in the pain. He consulted the most examinent medical ment in the pain. He was strongly averse to quackery, as he termed it, but backed by my recommendation, he was induced to try the 'Blood mixture,' and the first bottle, as if it were a charm, relieved the heat and tehning, and a regular persistence and continuouse for a short time has well nigh worked a miracle. The buttler has just heer in and says how delighted and grateful his matter is, and also astounded at such a change. He is now able to get about and travel a usual. I wish he could be provailed to give a testimonial. His name and the patch fact would be priceless.—Your truly, "Williamson."

WONDERFUL CURE of ULCERATED SORE LEGS of 18 YEARS' STANDING.

Messrs. C. Mumby and Company, Pharmaccutical Chemists, Gosport, write as follows:

"Sir.—We have received the enclosed testimonial, and have much pleasure in forwarding it to you. As he obtained the medicine from us, we can vouch for the truth of kis statement. "A Rebussian Market Mar ty the same.

CHILDREN CUTTING TEETH.
CAUTION TO PURCHASERS,
The value of this well-known Family Medicine has been largely tested in all parts of the world, and by all grades of society, for upwards of FIFTY TEARS. Its well-earned extensive sale has induced spentous partners, some of which in ourwain APPKARANCE so closely resemble the original as to have deceived many purchagers. The proprietor, therefore, feels it due to the public to give a special caution against the use of such imitations. Purchasers are therefore requested carefully to observe the four following distinctive characteristics, without which none are genuine:—

That magnificent station, CUBBIE, situated on the Culgos,
Isolandool, and Bokien Nivers, in the Maranoa district,
and consisting of it blocks of the RIGHEST FATTESING COUNTRY, comprising the extensive area of
25,000 acres.

The HERD numbers about 16,000 head of the very best bred
cattle, and of that number at least 4000 are BULLOCKS OF
FATTENING AGES, which can be turned off prime, and sent to
market during the year.

ATTENING AGES.

Thick can be turned off prime, and sent to marked during the year.

The country is all first-class, and is covered with the riches, fattening graness and herbage. It is also splendidly watered; and it may here be monitoned that during the late severe drought that this and other districts have passed through the bosse on his run were not only triffing, but the stock held their own as to condition, and the proof of this consists in the number of eatie now being offered with the run.

IMPROVEHENTS are all first-class and substantial, consisting of good dwelling-house of 12 rooms, kitchen, out-offices, &c.; parten, well stocked; new stockyard, just fluished, and all other appliances for the efficient working of so large and valuable a property.

In offering these very choice properties for sale, the Auctioneers onfidently invite inspection, and desire to draw the attention of NYENDING PURCHASERS, CAPITALISTS, and STOCK-WNEILS to the fact that these stations are most favourably thated for the sale of stock for the Queenland, Sydney, and sinated for the sale of stors for the Queensana, system Melbourne markets.

It is also a matter of great importance that, while both properties are so close to New South Wales, the lower end of Cabbie being only 12 miles over the New South Wales boundary, and that of Bullamon about 25 miles, they possess the great dayntage of being under the long leases of Queensland, nearly the whole of the blocks having yet to run up to the year 1850. WABBRA,
in the pastoral district of Macleay,
together with together with about 4400 well-bred cattle, borses, plant, AAA. Lill. Prechold and conditionally purchased land, belongings of station, &c., &c.

Wabbra is situated on the Macleay River, to which it has an extensive frontinge, it is lesides intersected by numerous permanent creeks, thus ensuring a plentiful supply of water in the direct seasons. The country is admirably indapted for cattle, being extremely healthy, and a large increase can be depended on with sectainty. THE CATTLE are quiet and well bred, every care having been exercised in their management, and any one inspecting can see from the return of sales that have been made from time to time he estimation in which the herd is held.

THE HOMESTEAD is most complete, consisting of good six coon dwelling house, kitchen of four rooms, and everything accessary for a comfortable home. THE IMPROVEMENTS for working in cattle are all first-class and of substantial character, and include large stock-yard horse and other paddocks, most huts, and all other requisites for the torking of a first-class cattle property.

The Austraneers confidently recommend this station to the notice of any one seeking a good payable property, and as it is for boune-life asis the opportunity of securing a desirable arrestment should not be overlooked.
